

Endorsement Letter – NPCA

At NPCA, we know the value of quality and safety. Whether it's our dedication to expanding the use of quality precast concrete or our ongoing commitment to plant safety, we provide resources and opportunities to our members to promote these values.

We've found that same characteristic in the insurance program available through CNA. The National Precast Concrete Association (NPCA) is convinced that the quality of CNA's program is strong enough to take on the unique challenges of the precast concrete industry, yet flexible enough to tailor a program to suit the needs of your individual business. That's why, after careful consideration, NPCA is endorsing CNA as the exclusive business insurance provider for the Association.

CNA was selected because it has long been recognized as the leader in developing insurance programs and providing safety and loss prevention resources for trade associations. We encourage you to review this comprehensive and competitive product, customized and responsive to the needs of NPCA members.

CNA provides the financial strength, market commitment and industry expertise to design and deliver a business insurance program especially for precasters. CNA will work closely with NPCA to continue to keep pace with this rapidly-changing industry.

This endorsement is not only the acknowledgement of CNA's reputation for delivering quality insurance programs for association groups, but also an appreciation for the carrier's commitment to industry-specific coverages, focus on safety and loss prevention and expert claim handling.

In an increasingly complicated insurance climate, it is our hope that this program will help stabilize your insurance cost, while at the same time, offer you peace of mind that your investment is properly protected.

Sincerely,

Ty Gable
President
NPCA
